PROFESSIONAL SUMMARY

Emerging Software Developer with hands-on experience in building and enhancing electronic systems using ASP.NET, implementing CRUD operations, and integrating data with user-friendly interfaces. Contributed to academic and professional projects including a comprehensive clearance system at King Fahad Medical City and family management platforms for web and Android. Proficient in HTML, CSS, JavaScript, C#, Python, Java, and SQL. Skilled in IT support, remote technical management, and cross-functional collaboration.

PROFESSIONAL EXPERIENCE

SMARTCAT COMPANY

IT Department Manager (Remote)

Feb 2024 – Nov 2025

- Directed IT operations and provided remote technical support to clients.
- Supported the development and execution of digital projects.
- Resolved technical issues on web platforms and ensured service continuity.
- Participated in virtual team meetings and delivered periodic performance reports to management.

King Fahad Medical City

Tamheer Trainee – IT Technical Support & Systems Developer

Riyadh | Jan 2025 – Present

- Technical Support & Systems Maintenance: Providing frontline IT support within a large-scale medical IT environment, troubleshooting system issues, and ensuring the operational continuity of critical healthcare applications.
- Reporting & Documentation: Designed user-friendly interfaces and automated the generation of structured operational reports in PDF and Excel formats to enhance decision-making and audit readiness.
- User Experience & System Optimization: Contributed to improving system usability and performance through continuous feedback integration, interface refinements, and workflow automation initiatives.

King Fahad Medical City

Cooperative Trainee – Full-Stack Web Developer
Riyadh | Jan 2025 – May 2025

Electronic Clearance & Permit Management System

- Developed a full-scale electronic clearance system using ASP.NET to manage permits and approvals.
- Implemented CRUD OPERATIONS and integrated data across multiple modules for seamless workflow.
- Designed intuitive user interfaces and automated the generation of structured reports in PDF and EXCEL.
- Enhanced system efficiency by AUTOMATING ADMINISTRATIVE PROCESSES and improving overall user experience.

Family Management Platform (Web & Android)

Princess Nourah University | Full-Stack Development

- Built a COMPREHENSIVE FAMILY MANAGEMENT SYSTEM with synchronized WEB and ANDROID platforms.
- Developed features for EXPENSE TRACKING, SHARED TASK MANAGEMENT, FAMILY CALENDARS, and REAL-TIME NOTE SHARING.
- Integrated a DYNAMIC CALENDAR that syncs across devices to manage appointments, important dates, and family activities.
- Ensured FULL DATA SYNCHRONIZATION between platforms, providing a COHESIVE USER EXPERIENCE and improving family coordination.

Aloha Spa

Receptionist & Administrative Support
Riyadh | Apr 2023 – Jul 2023

- Welcomed clients and managed daily appointments efficiently.
- Responded to inquiries and resolved administrative issues.
- Managed company social media accounts and online engagement.
- Coordinated booking and scheduling processes to enhance service flow.
